Re: Annual CCR Fugitive Dust Control Report  
R.D. Morrow Power Generating Plant  
Purvis, Lamar County, Mississippi

Dear Mr. Hocutt:

Cooperative Energy (formerly South Mississippi Electric Power Association) retained Environmental Management Services, Inc. (EMS) to prepare an Annual Dust Control Report for the R.D. Morrow, Sr. Generating Station located in Purvis, Mississippi. The purpose of this report is to comply with the air criteria in the federal Coal Combustion Residual Rule (CCR Rule) 40 CFR 257.80(c) requiring an Annual CCR Fugitive Dust Control Report, and 40 CFR 257.80(d) regarding notification and posting of the information. SMEPA has previously prepared a CCR Fugitive Dust Control Plan dated October 16, 2015 and placed it in the operating record.

The CCR Rule includes the following provisions regarding Annual CCR fugitive dust control reports:

*(c) Annual CCR fugitive dust control report. The owner or operator of a CCR unit must prepare an annual CCR fugitive dust control report that includes a description of the actions taken by the owner or operator to control CCR fugitive dust, a record of all citizen complaints, and a summary of any corrective measures taken. The initial annual report must be completed no later than 14 months after placing the initial CCR fugitive dust control plan in the facility's operating record. The deadline for completing a subsequent report is one year after the date of completing the previous report. For purposes of this paragraph (c), the owner or operator has completed the annual CCR fugitive dust control report when the plan has been placed in the facility's operating record as required by § 257.105(g)(2).*

*(d) The owner or operator of the CCR unit must comply with the recordkeeping requirements specified in § 257.105(g), the notification requirements specified in § 257.106(g), and the internet requirements specified in § 257.107(g).*

In accordance with the notification requirements, the Mississippi Department of Environmental Quality (MDEQ) shall be notified about the completion of the annual CCR Fugitive Dust Control Report, and the final report shall be placed on SMEPA's publicly accessible website in accordance with the CCR rule.

In the time since SMEPA prepared its CCR Fugitive Dust Control Plan dated October 16, 2015, no citizen complaints have been received. In order to control fugitive dust, SMEPA has continued to operate the dust control measures described in the Dust Control Plan. No significant changes

have been made to the plan or operating of the plant in the last year that would affect the generation of dust from CCR materials. No corrective measures are needed at this time.

I hereby certify, as a Professional Engineer in the State of Mississippi, that the information in this document was assembled under my direct personal charge. This report is not intended or represented to be suitable for reuse by South Mississippi Electric Power Association or others without specific verification or adaptation by the Engineer.

Sincerely,

*Environmental Management Services, Inc.*

Christopher T. Johnson, P.E., P.S.  
Engineering Manager
